

The tables below shows parliamentary seat forecasts for the House of Commons for England, Scotland and Wales. All three tables are based on polling performed by Focalddata that was commissioned by Best for Britain. Each table below includes a short description of how each dataset has been obtained. No polling was conducted in Northern Ireland.

Baseline: Focalddata MRP								
Collected by Focalddata on behalf of Best for Britain. This data was collected from a representative sample of 10,010 adults (18+) living in Britain between 20-26 October 2022. About 75% of the fieldwork was completed before Liz Truss resigned. In response to this, Focalddata ran a top-up poll of 2,000 respondents between 28-30 October. The modelling uses data across all 12,000 respondents. Users filled out the surveys in real-time across mobile, desktop, and tablet devices on the Focalddata platform. These respondents are sourced from different panels, which we then apply additional quality checks to in order to ensure the responses are of the highest quality. MRP weights these respondents to be representative of both national and sub-national (e.g. constituency) demographics. To find out full information about Focalddata's methodology, you can do so by reading a note from Focalddata here .

Scenario 1: Age Profile								
Analysis by Best for Britain, based on MRP and poll data collected by Focalddata. This data was the result of Best for Britain redistributing the 'Don't Know' vote share from the MRP returned by Focalddata to all Westminster parties to project how many parliamentary seats each party would win, based on how closely the demographic age profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. To see how the redistribution of wavering voters was calculated, you can find out here .

Scenario 2: Education Profile								
Analysis by Best for Britain, based on MRP and poll data collected by Focalddata. This data was the result of Best for Britain redistributing the 'Don't Know' vote share from the MRP returned by Focalddata to all Westminster parties to project how many parliamentary seats each party would win, based on how closely the demographic education profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. To see how the redistribution of wavering voters was calculated, you can find out here .

Focaldata MRP constituency-level analysis commissioned by Best for Britain in November 2022 with Best for Britain's subsequent analysis to redistribute 'Don't Know' responses to the Westminster parties in each constituency based on how closely the demographic age profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. This table includes information and projected voting percentages for every parliamentary constituency in England, Scotland and Wales. To find out more about Best for Britain's methodology, you can do so by reading [this document](#).

Focaldata MRP constituency-level analysis commissioned by Best for Britain in November 2022 with Best for Britain's subsequent analysis to redistribute 'Don't Know' responses to the Westminster parties in each constituency based on how closely the demographic age profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. This table includes information and projected voting percentages for every parliamentary constituency in England, Scotland and Wales. To find out more about Best for Britain's methodology, you can do so by reading [this document](#).

Focaldata MRP constituency-level analysis commissioned by Best for Britain in November 2022 with Best for Britain's subsequent analysis to redistribute 'Don't Know' responses to the Westminster parties in each constituency based on how closely the demographic education profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. This table includes information and projected voting percentages for every parliamentary constituency in England, Scotland and Wales. To find out more about Best for Britain's methodology, you can do so by reading [this document](#).

Focaldata MRP constituency-level analysis commissioned by Best for Britain in November 2022 with Best for Britain's subsequent analysis to redistribute 'Don't Know' responses to the Westminster parties in each constituency based on how closely the demographic education profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. This table includes information and projected voting percentages for every parliamentary constituency in England, Scotland and Wales. To find out more about Best for Britain's methodology, you can do so by reading [this document](#).

Focaldata MRP constituency-level analysis commissioned by Best for Britain in November 2022 with Best for Britain's subsequent analysis to redistribute 'Don't Know' responses to the Westminster parties in each constituency based on how closely the demographic education profile of the wavering voters matches the profile of each parties' prospective voters, and; the vote share of each party before the redistribution of wavering voters. This table includes information and projected voting percentages for every parliamentary constituency in England, Scotland and Wales. To find out more about Best for Britain's methodology, you can do so by reading [this document](#).
